## Electrical Specifications

Control Type	RS-232, I <sup>2</sup> C or USB
Supply Voltage	12 VDC
Power Consumption	5.6 W max. Operating 8.6 W max. Start Up

- Specifications are without connector loss. IL adds 0.2 dB for one pair connector loss.
- All measurements taken at room temperature for the set wavelength band index.  
Note: Each wavelength band has its own wavelength band index, which can be set to optimize the optical performance for that band. Only one wavelength band index can be selected at a time. The provided wavelength band index will be 1310nm, 1550nm & 1625nm for the full band version. Set a nearby wavelength band index to have the best performance if the selected band has no wavelength band index.
- For multi-band operation, add up to 0.2dB IL max over entire range.
- Stability is defined as the difference between highest and lowest insertion loss for a given connection, over a given period.
- Defined over 10 second period using 10 kHz sample rate.
- The Wavelength Dependent Loss (WDL) is measured from CWL +/- 20nm.
- Polarization Dependent Loss (PDL) is for single-mode fiber.
- Polarization Extinction Ratio with connectors is 18 dB typ., 14 dB min.
- Repeatability is defined over 100 cycles.
- Extended operational temperature ranges are available.
