# **MEMS 96X96 OPTICAL MATRIX SWITCH MODULE**

SX3 Model, Single Mode Fiber, Standard Grade

**MEMS Optical Matrix Switch Module** is built with DiCon's proprietary MEMS technology. Each module contains 2 sets of MEMS mirrors for making 1-to-1 connections between input and output ports. The MEMS mirrors are held in position using precisely calibrated voltages and require no feedback control. This unique quality enables the switch to maintain stable connections and allows the device to function when there is no light in the fiber. This innovative platform has an outstanding track record and delivers best-in-class optical performance

- Proven MEMS technology
- Lifetime > 10<sup>9</sup> switch cycles
- No dithering or active alignment artifacts
- Switches and holds dark fiber connections
- · Low insertion loss with excellent stability
- Compact and lightweight
- Asymmetric MxN available
